Adam Bawatneh

Orlando, Florida | (718) 781-7009 | Adam.Bawatneh@ucf.edu
Website | GitHub | LinkedIn

Research Interests

Social reasoning and Theory of Mind, including how people represent others' beliefs, intentions, and interactions. Interests include natural language processing, machine learning, and responsible AI.

Education

University of Central Florida Orlando, Florida
Ph.D. in Computer Science Fall 2025 – Spring 2029 (expected); GPA: 4.00/4.00
University of Central Florida Orlando, Florida
B.S. in Computer Science Spring 2025

Selected Publication

Adam Bawatneh*, Sagar Sapkota, Amrit Singh Bedi, Santu Karmaker, and Mubarak Shah.
"OmniToM: Benchmarking Theory of Mind in LLMs via Explicit Belief Modeling."
NeurIPS 2026, Evaluations & Datasets Track. Project | Benchmark

Research Experience

Graduate Research Assistant, University of Central Florida May 2026 – Present
Conduct AI research and contribute to government proposal development, including IARPA-focused proposals.
Undergraduate Teaching Assistant, University of Central Florida May 2023 – Spring 2025
Led labs and mentored students in C, Python, and Java courses serving more than 1,500 students.

Selected Research Projects

OmniToM: Social Reasoning Evaluation for LLMs Oct 2025 – Present

- Led development of a benchmark spanning 895 stories and coordinated quality review with 11 annotators across more than 1,100 hours.
- Built benchmark and evaluation workflows; tested commercial and open models using cloud and university computing resources.

CADS: Context-Aware Detection of Specialized Language Summer 2026 – Present
Mentored Valerie Lopez during the summer REU; the project continues in the lab.

- Developed and evaluated an NLP pipeline that combines complementary text signals to identify specialized language.
- Reached 80.1 F1 on GenZ-A and tested transfer across domains and languages, identifying limits in generalization.

BIAS-101: Demographic Bias in Video Action Recognition Jan 2025 – Apr 2025
Screened 85,000+ videos, curated 2,000+ clips, and analyzed demographic representation in the UCF-101 action dataset.
DETECT: Real-Time Gaze and Facial-Signal Analysis Aug 2024 – Apr 2025
Led a 6-member team to build and deploy a real-time gaze and facial-signal system. Project evaluation reported 80%+ gaze-tracking accuracy.

Academic Service

Conference reviewer: NeurIPS, AAAI, and ACL.

Technical Skills

Research: Social reasoning, Theory of Mind, research design, benchmarking, experimental analysis
AI: Natural language processing, machine learning, language models, model evaluation, responsible AI
Programming: Python, C/C++, Java, JavaScript, Go, SQL
Development: APIs, Git/GitHub, Linux, Docker, PostgreSQL, cloud computing, high-performance computing, LaTeX
